

The K9**Caller** is not an ordinary car alarm. It is designed specifically to protect your dog from heat stroke in those times that you need to leave them in a vehicle unattended.

The K9**Caller** Interactive Remote Control

The K9**Caller** is capable of maintaining a comfortable temperature for your dog while you are away from your vehicle. The K9**Caller** not only starts the engine to run the A/C, it will also turn the engine back off when a cool temperature is reached. It then repeats this process if the inside temperature goes up and out of a safe and comfortable range. The system keeps you informed of what is taking place at your vehicle by updating you on your remote control.

K9Safety has been a leading provider of systems to law enforcement agencies for over 15 years.

K9SAFETY

A Better Breed of Systems™

The K9**Caller** is installed on a vehicle just like a car alarm. There are car alarm & stereo shops across the county that can install the K9**Caller**.

The K9**Caller** works on RVs as a fail-safe for your generator powered cooling system.
